Objective/Description

The investment seeks long-term growth of capital. The fund invests primarily in equity securities of foreign issuers that are considered by the managers to have strong earnings growth. It focuses on marketable equity securities of foreign companies that are listed on a recognized foreign or U.S. securities exchange or traded in a foreign or U.S. over-the-counter market. The fund normally invests in the securities of companies located in at least three countries outside of the United States. It may invest up to 20% of total assets in companies located in developing countries.

There is no assurance the objectives of the Fund will be met.

Investing in foreign securities presents certain unique risks not associated with domestic investments, such as currency fluctuation and political and economic changes. This may result in greater share price volatility.
