Objective/Description

The investment seeks capital appreciation. The Fund mainly invests in common stocks of small-capitalization U.S. companies based on fundamental analysis and quantitative models. The fund normally invests at least 80% of net assets in securities of companies having a small market capitalization. Small-cap issuers are defined as those companies whose capitalizations are less than or equal to the largest company in the Russell 2000 and S&P Small-Cap 600 indices.

There is no assurance the objectives of the Fund will be met.

Smaller companies may present greater opportunities for capital appreciation, but may also involve greater risks than larger companies. As a result, the value of stocks issued by smaller companies may fluctuate more than stocks of larger issuers.
